

+1,000,000 people die of viral hepatitis every year

350 MILLION
PEOPLE ARE LIVING
WITH VIRAL HEPATITIS

ONLY 10%
know they have it

VIRAL HEPATITIS IS THE MAIN
CAUSE OF LIVER CANCER

Resources to fight viral hepatitis are very scarce

If nothing is done, by 2040 hepatitis will claim more lives than HIV/AIDS, tuberculosis and malaria combined

The time to act against viral hepatitis is now

Support this historic effort to create an hepatitis free world

The Hepatitis Fund

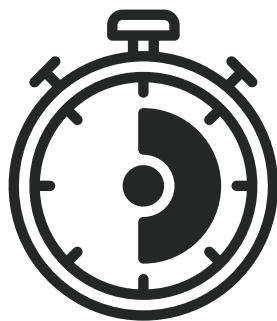

1,000,000 newborns are infected by hepatitis B every year

A birth dose vaccine can prevent
transmission and is available from US\$0.20

- Half of the newborns worldwide do not have access to it
- 5% of infected pregnant women worldwide are treated

1 person dies every 30 seconds
from viral hepatitis

We can't afford to wait to rid the
world of this deadly disease

The time to act against viral hepatitis is now

Support this historic effort to create an hepatitis free world
