

The Hepatitis Fund mission

The Hepatitis Fund seeks to:

- **Increase funding** for viral hepatitis programmes globally and foster new public and private investments and financing mechanisms.
- Fully exploit **synergies in global health**, as well as **enhance hepatitis awareness**. It is making the global funding for hepatitis elimination bigger.
- Leverage domestic resources by providing direct **catalytic grants** for capacity building towards hepatitis elimination as a public health threat, integration of hepatitis in the universal health coverage package, and financial autonomy. THF aims to fill the funding gaps so that no one is left behind by global health mechanisms.
- Reach the United Nations Sustainable Development Goals (**SDGs**), in particular, SDG 3.3 and 3.8. THF supports the implementation of the World Health Organization (WHO) Global Health Sector Strategy on Viral Hepatitis (2016) and the triple elimination initiative of vertical transmission of HIV, syphilis and hepatitis B . THF is committed to cancer prevention, as per SDG target 3.4 .
